

Typography

Course No. VA-205

Department of Art + Architecture

University of San Francisco

Mondays + Wednesdays + Fridays 3:00-4:50 p.m.

Fall Semester 2010

Course Description

This course will introduce students to the practice, history, and theory of typography. Through design research, independent project work, and collaborative exercises; students will produce typographic solutions to applied and experimental problems using typography as their primary, if not exclusive, design element. Course work will include independent student research, sustained project work, and critiques, emphasizing the perceptual and contextual properties of typographic design. Lectures, readings, and guided discussions will supplement project work, introducing students to the topics of letter form design, printing history, typographic classification, and textual representations.

To successfully complete this course, students will be expected to understand and emulate the principles of typographic practice that began in the early Renaissance and continue with contemporary digital design. Students will also be expected to demonstrate both leadership and collaboration skills while working with their fellow students towards the completion of group project work.

Professor: Stacy Asher

Telephone: (415) 312-7810

Email: sjasher@usfca.edu

Office Hours: by appointment.

Learning Outcomes

By the end of the semester, students will be expected to:

Identify, specify, and classify printing types and fonts of historical and cultural significance through completion of a final exam on typographic history.

Explain the significance of typographic history, with an emphasis on learning the ways in which typography, as a discipline, has been influenced by the economic, social and/or political conditions of a place and time, through participation in group seminars, submission of annotated project bibliographies, and writing of final project text.

Demonstrates skill using typography as a component of visual communication, through submission of design process documentation and final project work.

Locate typography critically within the disciplines of fine art and linguistics, and demonstrate use of typography to meet formal and conceptual objectives within those disciplines, through visual presentation of project plans and submission of final project work.

Demonstrate fluency with typography as a tool for cultural representation in particular, the processes through which typography represents the identity values of its producers and users, through visual representation of conceptual project plans and submission of final project work.

Course Structure + General Policies

The course assignments address the complex issues of typography. Each project or problem, is carefully structured to create conditions conducive to discovering the language of typography. These conditions encourage exploration of visual communication concepts and design principles, allowing students to develop more personally expressive ways of solving communication problems. Approximately one semester will be spent in lecture and class discussion; the remainder of the class will be spent in critique of student work. All students should be prepared to spend a significant amount of time outside of the allotted class time on process and production of projects. Under this instructive approach, personal and intuitive concepts are stressed over specific technical skills. These skills and techniques needed to execute the assignments are not taught; they must be developed through involvement with the problems.

All students are expected to actively participate in class critique, class discussions and work with peers to provide constructive feedback; this will provide a positive studio experience. Lack of participation will impact your final grade. Students who do not participate in class critique or individual discussions with faculty when scheduled should not expect private critique with faculty at a later date.

If at anytime during the semester you want feedback on your project or performance, or wish to discuss any issue related to school or the field of design, please feel free to see me during office hours or arrange an other convenient time.

Preparation for Class

Students are to be prepared at the start of each class with assigned work and supplies. Continual lack of preparation will impact your final grade. A large percentage of class time for this course will be spent in guided discussion as lectures, project critiques and seminars. Students should therefore, expect that this course will follow a “hybrid” lecture/studio format, and that much of the individual project work will develop outside of the class. Students should plan to spend class time working on project work or research for this class. Any student found working on assigned project work for another course, or concentrating on personal, extracurricular interests, including internet use, will be asked to leave class and will be given an absence for the period. Text and e-mail messaging is not allowed during class time. Students should not spend class time using the library or any other research facility on campus without the professor’s consent.

Class preparation is essential to receiving feedback on one’s work. If, at the beginning of class, you are not prepared with the required number or type of sketches, materials, etc., do not post your work on the board for feedback. Do not work on your project, other projects or talk with others about irrelevant issues during critiques.

Students who miss lectures and class discussions due to absence must obtain notes for the classes missed and assignments from a classmate prior to the next class period. I will be glad to clarify information pertaining to the course. It is not possible to repeat lectures that elaborate on project descriptions on an individual basis. Students should make every attempt to obtain general information from classmates before discussing details with faculty.

Cell phones must be turned off in class time. Students will not be allowed to listen to music via speakers or headsets during class time.

Reading Assignments

Students in this course are expected to participate by developing a visual awareness of form and content in design, reviewing outside periodicals and design publications. From time to time readings from required and supplemental materials will be assigned. Discussion will follow these readings to clarify, pose questions and ensure understanding of the material which relate to Typography. A quiz may be given on the discussion days.

Religious beliefs

You must declare your intention to observe holidays [include name of holiday and dates] in writing within the first two weeks of the semester.

Plagiarism

Students will observe and respect the university's policy regarding plagiarism as noted in the college's Academic Honesty Policy. As this policy stipulates, all writing submitted for this course, whether in "draft" form or final form, must not represent the words or ideas of another person without reference or citation. Any student who violates plagiarism standards or any other Academic Integrity standards can expect to receive a failing grade for the project and the course. Failure to abide by this rule will result in failing the course and could result in expulsion from the college.

Evaluation

Final Grades are the result of many areas of evaluation. Semester grades will incorporate a variety of factors, notably conceptual development, engagement with design process, quality of presentation, attendance, effort, level of interest and participation in class, three projects, annotated bibliography, an on-line journal and one final examination.

While attendance and class preparation appear to relate most directly to professionalism [attendance, deadlines, verbal articulation, participation], they also affect other areas of evaluation. Faculty rely on classroom observation and discussion in evaluating a student's process [in addition to the process notebook]. Students who attend class and are prepared for the

scheduled activities/discussions, reveal valuable information about their performance that may not be evident in the final comprehensive. In the absence of such information, faculty must resort to an unsatisfactory rating in evaluating the student's process.

The final evaluation of work [realization] involves more than totaling the grades on individual projects and/or determining that all assignments have been completed. Faculty assess students' abilities in realizing concepts and controlling the visual elements of communication throughout the semester. Improvement and the mastery of increasingly complex material are evaluated. Students who miss lectures, project explanations, and class discussions may be able to complete projects within deadlines but rarely demonstrate the understanding of students who attends on a regular basis. Since faculty organize courses of study so that projects build one upon another, students who miss information or fail to understand projects early on are at a disadvantage throughout the semester.

Three projects will be assigned during the semester. Project work assumes that each student will devote an equivalent amount of time to homework assignments each week (six hours) as to time spent in class. Each project must be turned in for grading following the critique, and projects cannot be returned until grading is completed. Students will be expected to save the beginning and intermediate stages of their work for each project in comprehensive fashion, and to submit these stages as an organized body of work (process book) for project grading. Any project that receives a grade below D must be reworked; no student will be able to pass the course with a F grade for any project.

Grading: Total possible points: 700

Projects 1 - 3 = 100 points each = 300 points

Excercises 4 = 25 points each = 100 points

Annotated Bibliography = 100 pts.

Personal Typography on line journal = 100 points

Final Examination = 100 points

100 – 94% A, 93 – 90% A-, 89 – 87% B+, 86 – 84% B, 83 – 80% B-,

79 – 77% C+, 76 – 74% C, 73 – 70% C-, 69% and below D

This course and its instructor are reflections of this. With regard to letter grades: The grade of "C" is satisfactory. It is not poor performance. If a student receives this grade they have put forth a reasonable amount of effort and attained acceptable [average] results.

A "B" grade shows the student has pushed beyond the average; they have understood the needs of the project and addressed them; they have employed their learning and have crafted successful resolutions to the design problems assigned. Students receiving a "B" have reached a level which clearly exceeds "competency"

The "A" is reserved for students who have attained excellence. They have, in fact, exceeded the expectations of the project's tasks put before them. Additionally, interest, enthusiasm, energy, and passion for design and the learning process have been displayed.

Deadlines

All projects and exercises are due on the day and time given, always at the beginning of class unless otherwise noted. Projects that are late will not be accepted.

Attendance Policy

Consistent and prompt attendance develops responsible professional behavior and insures that students have access to the full range of experiences and information necessary to complete class assignments and acquire skills and knowledge emphasized in a university education.

Consistent with college practice, students are expected to attend all sessions of courses for which they are registered. Only two unexcused absences will be allowed. The third unexcused absence will lower your final semester grade by one letter. The fourth unexcused absence will result in an unconditional absences failing the course. Field trips, outside lectures, and any other special events that take place outside of the classroom during class time will also count towards final attendance.

Students should be informed that the allotted absences [2] are to accommodate routine illness, weddings, car trouble, etc. doctor appointments, advisor conferences, trips to supply stores and labs, employment, etc., should not be scheduled to conflict with class. Faculty cannot be placed in the position of determining which absences are excusable and which are not. All students are expected to attend class on a regular basis. Prolonged illness should be verified by a physician and may require the student to withdraw from class if he/she cannot complete work in a comprehensive and timely manner.

Tardiness is defined as being ten minutes late for class or departing before class has been formally dismissed by the professor. Two tardies are counted as one absence. [note: tardiness that exceeds 45 minutes will be counted as an absence] It should be further noted that faculty are frequently called upon to recommend students for professional positions upon graduation and are contacted by potential employers as references. In such instances, reliability is always discussed. Students with a responsible record of attendance are likely to receive favorable recommendations.

Students arriving late for any critique or final presentation will be asked to leave their work with the professor and will not be allowed to remain in class for the critique.

Documentation

Students are also required to turn in a DVD of all work produced for the class, including process, and final presentation results. Photographic documentation of students in process throughout the semester will be produced.

Students are required to keep a process book [3 ring binder] of all phases of work for each project. At times I may request that I access your course projects and process books for documentation. Various projects and you may be required to submit your work for public documentation.

In addition, students will build and maintain an online journal of documentation of the evolution of your process throughout the course. Each project and the series of exercises / studies produced will be documented on a personal blog. This personal journal [100 pts.] will count towards your final grade. This on line journal will be reviewed at various points throughout the semester to ensure adequate entries and caliber of content. This will also be a site for your annotated bibliography to be published.

On December 3, students will submit their on line Journals for evaluation. The Annotated Bibliography produced for this course must be included in your journal.

Accommodations

Students with disabilities who may need academic accommodations should discuss options with me during the first two weeks of class.

Annotated Bibliography

Each Student will turn in an annotated bibliography of ten or more readings (books or design journals only) to represent their cumulative project research for the semester. Each annotation must begin with the title, author, and publisher of the chosen text, using the citation style featured in the Recommended Reading list, followed by a 150-word description of this text, including its merits or detriments as a personal research tool and the ways it informed your thinking, your design process, and/ or your work.

On December 3, students will submit their Annotated Bibliography to me as digital files (Microsoft Word format) and have posted them to your on line journal. Students should simultaneously submit them to Turnitin, the plagiarism prevention website at www.turnitin.com. I will provide the necessary log in information as we get closer to the deadline.

Supply List

Students should have the following items available for use on a daily basis:

Epson single -weight or presentation weight matte paper for project printing, various sizes up to 17" X 22"
Schaedler Precision Rulers
Scissors
X-Acto Knife and #11 blades
Cutting mat
Rubber Cement (Best Test)
Drafting Tape or artist's tape, white
Recordable CD or DVD Roms and external jump drive for storage, transfer and backing up files.
Digital Camera
Xeroxes as needed
Sketchbook
Various drawing tools
Black, 3-ring binders for process books [3 total]
PUSH PINS

Study Topics

Expect to be able to identify the font characters included by sight, and to specify the correct historical period, date of design, and original designer for each family shown below.

Aksidenz Grotesk	Baskerville
Bembo	Bodoni
Caslon	Century Schoolbook
Clarendon	Didot
Fraktur	Franklin Gothic
Futura	Garamond
Gill Sans	Meta
Trump Mediaeval	Univers

Study the terminology listed below, and expect to be able to describe the significance of at least fifteen of the following terms:

ampersand	ascender	axis
baseline	blackletter	bleed
bracket	cap height	counter
dingbat	descender	em/en
expert set	figures	folio
flush left/right	foundry	glyph
gothic	grotesque	gutter
humanist	justify	kerning
ligature	lining figures	lower-case
measure	non-lining figures	orphan
point/pica system	recto/verso	roman
serif	slab serif	terminal
thicks/thins	tracking	uncial
upper-case	widow	x-height

Typographic Sorts

opening quotation	“	option [
closing quotation	”	option shift [
inch marks	“	“
opening single quotation	‘	option]
closing single quotation	’	option shift]
apostrophe	’	option shift]
em dash	—	option shift -
en dash	–	option -
hyphen	-	-
ellipsis	...	option ;
fraction bar	/	option shift 1
forward slash	/	/
ligature ae	æ	option ‘
ligature fi	fi	option shift 5
ligature fl	fl	option shift 6
bullet	•	option 8
cedilla	ç	option c
accent acute	á é	option e followed by character
accent grave	à è	option ` followed by character
tilde	ñ	option n
umlaut	ü	option u followed by character
circumflex	^	option i
copyright	©	option g
registered	®	option r
trademark	™	option 2
degree	°	option shift 8
section	§	option 6
paragraph	¶	option 7
dagger	†	option t
cents	¢	option 4

Fonts with expert sets” will include a variety of other useful sorts, such as single-keystroke fractions.
